“Still hard to grasp computing.”

Worksheets: good.

Class meetings: good.

Extra resources: good.

Videos: good.

Lab tutors: good.

Fast paced in some classes.

"The lab sessions. Most of the helpers in there are useful but when there is only 3 to cover a class of 20, sometimes it is not possible to get many questions answered. "

"I would have preferred more time in between Monday's lecture introducing things and my tutorial first thing the next morning."

"Put the recording online sooner so that we get the chance to catch up before the next lecture."

“Explain earlier in more detail what the course work should look like.”

“Feel the Thursday 0900 am has the most valuable info after labs but hardly anyone turns up.”
